

Designs to Quilt Using the

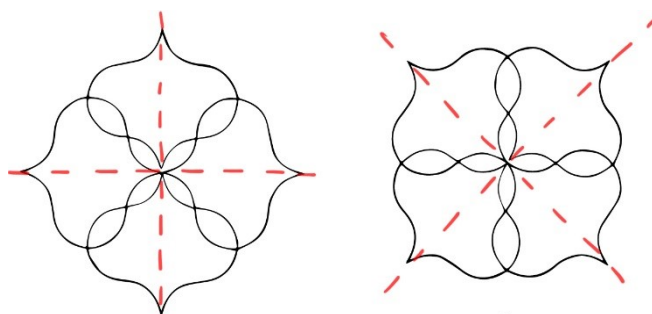

Arabesque Ogee 4x4 Template Set

The Ogee 4x4 template(s) may be used to create a “mesh”. This pattern may be left as is, or the spaces may be subsequently filled with a variety of dense fills.

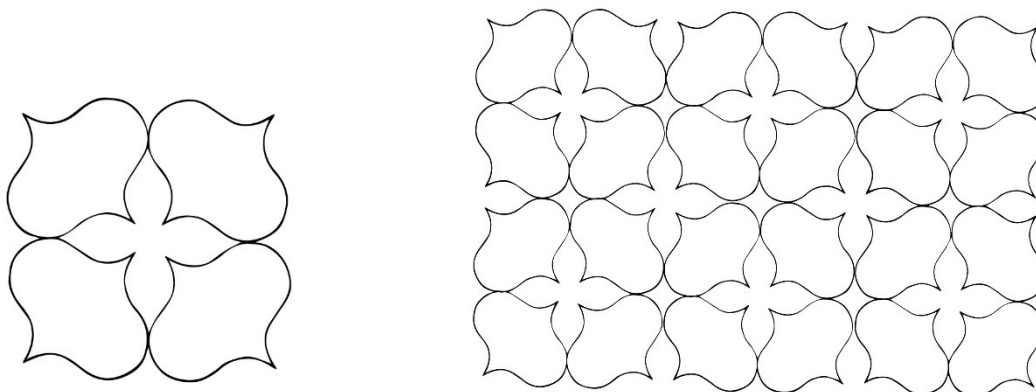

To most simply execute this mesh, mark a 4” grid. A slightly simpler approach would be to mark vertical lines spaced 4” apart (red dashed). It is recommended to mark a starting line for the grid (blue dashed) as well as 4”-spaced hashes along the marked vertical lines (red) to indicate where one ogee ends and next begins.

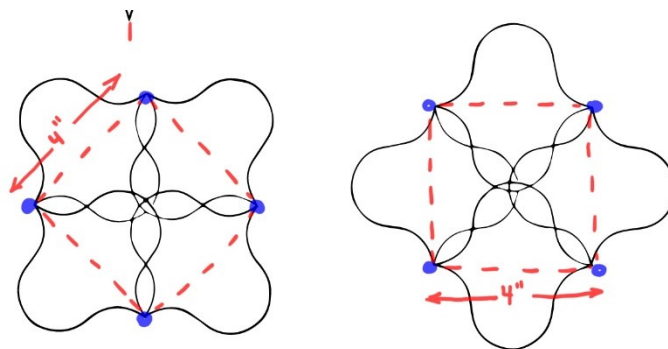

The Ogee 4x4 template can be used to create mandala-like patterns. These two designs create from a center point.

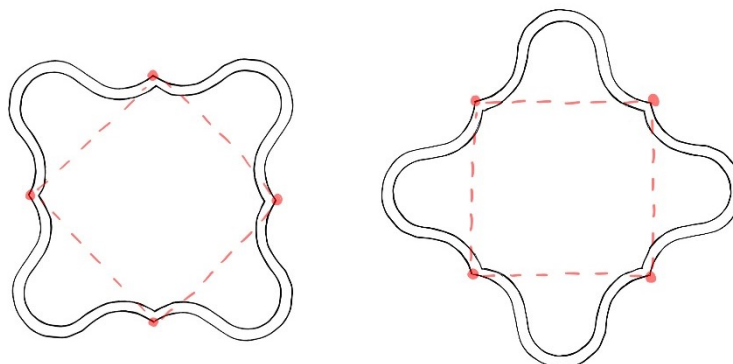

When the ogee shapes are allowed to offset from the center point (left), a lovely secondary pattern results. This can be expanded into a beautiful “grid” leaving three key shapes that may be quilted with fills to better accentuate the design.

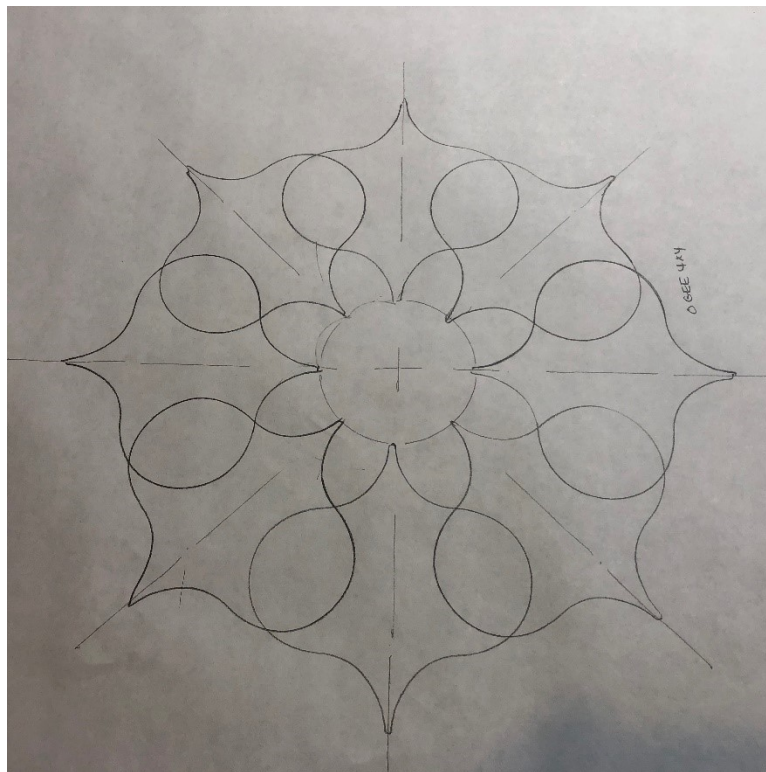

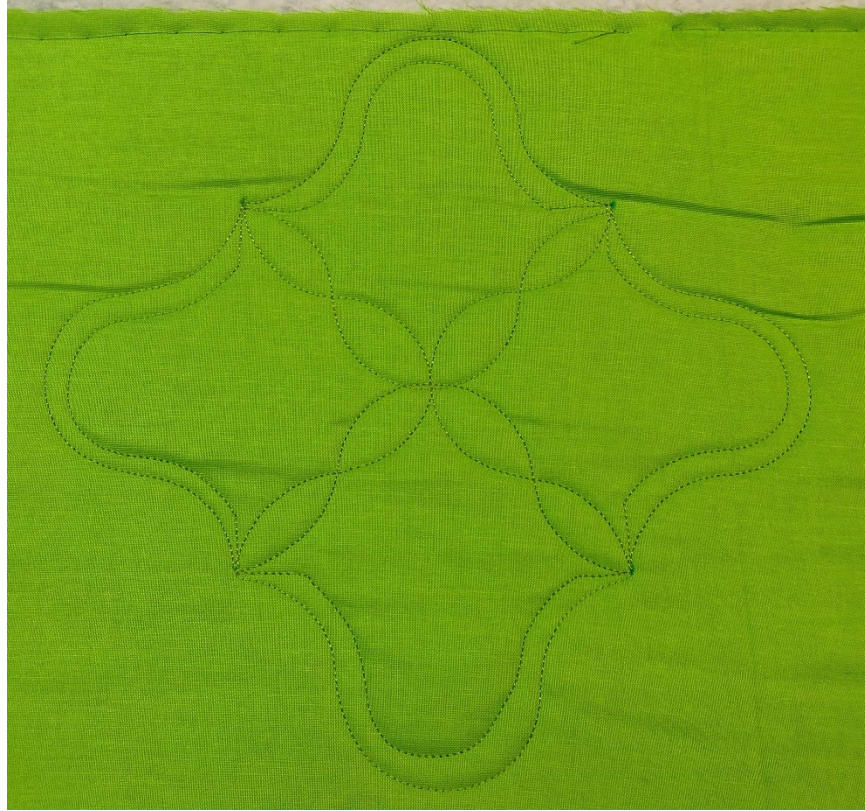

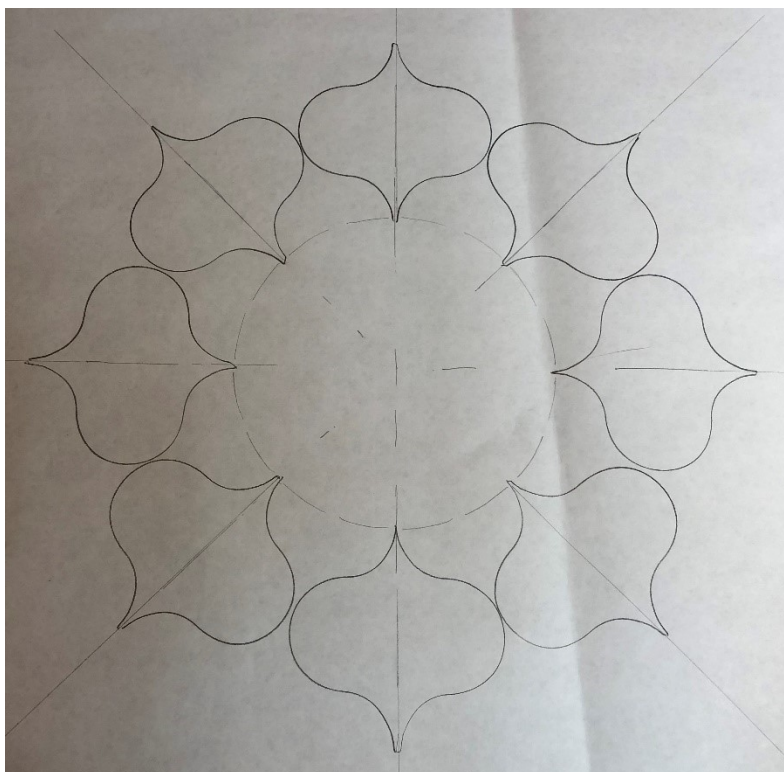

Two last mandalas are shown next. Suggested marking is indicated in red. These may be marked with only the blue corner dots, if desired, or with a fully marked 4" square (red).

Frames may be created by marking a 4" square, either straight or on-point. Each side of the square receives half of the ogee design. Quilt the echo after the outer frame is stitched. The frame on the left occupies a 6-1/2" x 6-1/2" space.

Comparison of stitched Ogee sizes:
