

Arabesque Arches Template

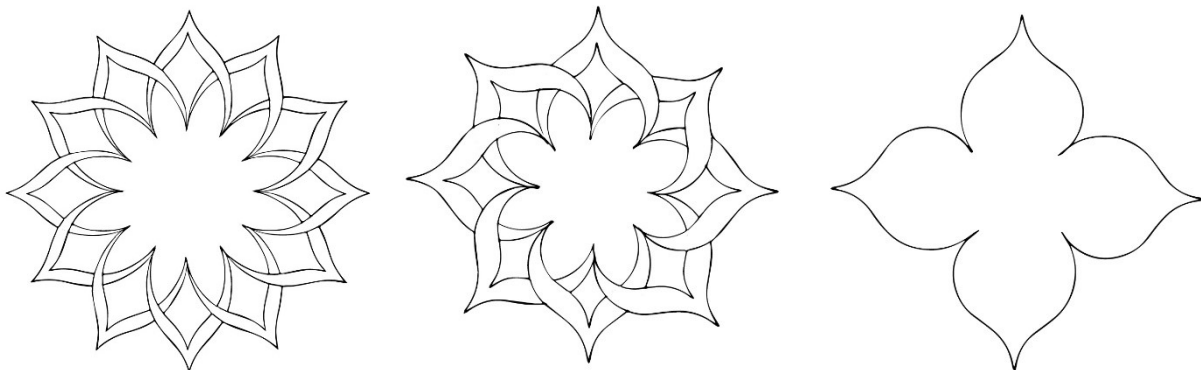

The Arabesque Arches template has two different gently S-shaped curves, both of which have a point of inflection. These curves make graceful arching frames and motifs. The template is a manageable 3" x 7" size and fits comfortably in a quilter's hand.

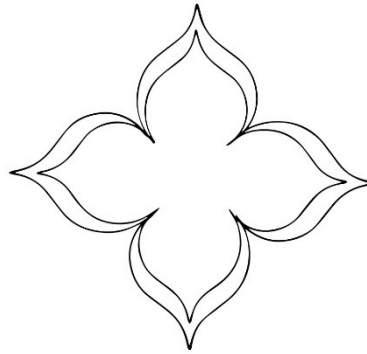

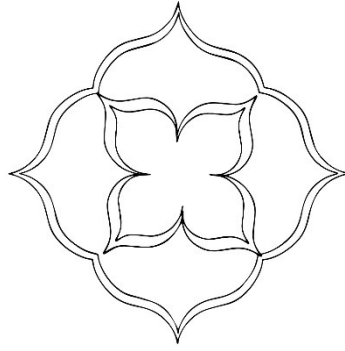

Frames that the Arabesque Arches template can make are shown below (A curve on left, B curve on right). The B curve produces frames suitable for 12" blocks or spaces, while the A curve produces frames for areas as large as 18-20" (on point). The template has $\frac{1}{4}$ " etched lines so that $\frac{1}{4}$ " or $\frac{1}{2}$ " echoes of the frames can be stitched. Additional markings aid with creating repeatably identical curves.

Creative Arabic-styled motifs can also be made with both edges of this template.

Combining several frames created with the Arabesque Arches template creates beautiful secondary patterns.
