

Design Ideas for the Ornament Template

Arabesque Ornament Template

The template may be used to create an attractive ornament “mesh” (below, left). The larger spaces may be filled with your favorite dense quilting designs to show off the relief of the double frames. To create this pattern, parallel lines spaced 4-3/4” must be marked.

Creative frames may also be created with the Arabesque Ornament Lg template (above right). A square frame of ~12-1/2” x 12-1/2” can also be created by using half of the pattern. It is created simply and elegantly with a marked 7-3/4” square. A larger frame may be created by quilting straight sections at the edges of the template (a marked centerline on each of the sides of the square is needed as well to easily enlarge).

A variety of tessellating background patterns are also possible, all of which generate unique secondary patterns.
